

Seminar of farming technique held

Resource personnel explaining to farmers how to use a modern equipment.

SANGUEM: Don Bosco College of Agriculture, Sulcorna, as part of its educational learning programme for its fourth year students, organised a seminar on farming techniques and equipment for the farmers from Sanguem taluka. The seminar was attended by a large number of farmers from the villages of Sulcorna, Ne-travali, Pirla, Rivona and Molcornem. During the seminar, the agriculturists were provided guidance and tips on innovative farming techniques and were also given an opportunity on ideas leading to use of new machines in farming. The farming professionals at the seminar gave in-depth information on ways to improve the farming yield and steps that could be taken to avoid diseases from destroying the agricultural fields. Prof Satish Patil and Ranjan Shelke briefed the farmers on the use of pesticides and its advantages when used judiciously. Shambu Gaonkar gave detailed information relating to the use of agricultural machinery. Fr Alwyn D'Souza welcomed while Aaron Andrade proposed the vote of thanks.
